TITLE: Financial advisory system

----- KWIC -----

At step 840, advice processing is performed. According to one embodiment of the present invention, based upon the user's preference among the decision variables, the system may offer advice regarding which decision variable should be modified to bring the portfolio back on track to reach the one or more financial goals with the desired probability. In addition, the system may recommend a reallocation to improve efficiency of the portfolio. An alert may be generated to notify the user of the advice and/or need for affirmative action on his/her part. As described above, the alert may be displayed during a subsequent user session with the financial advisory system 100 and/or the alerts may be transmitted immediately to the user by telephone, fax, email, pager, fax, or similar messaging system.

TITLE: Automated system and method for
customized and personalized presentation of products
and services of a financial institution

----- KWIC -----

In an embodiment of the present invention, the presentation engine receives the advice generated by the advice engine and automatically packages and presents the advice to the customer in the presentation format identified for the customer by the presentation engine as preferable to the customer, for example, from the token data for the customer. In packaging the advice, the presentation engine, for example, modifies one or more aspects of the manner of presentation as indicated by the token data, such as the presentation screen, the presentation voice, the presentation colors, and the presentation music. Further, the presentation engine presents the advice to the customer through a medium according to the token process of the financial institution, such as phone/interactive voice response, personal computer/browser, network/Internet, kiosk/intranet, recruitment center/self service, automated teller machine/self service, personal digital assistant/digital, and an agent at a desktop/browser.
